***Response to Amendment***

The amendment filed on 01/11/2006 under 37 CFR 1.111 is sufficient to overcome the Stamatov in view of Brown 35 U.S.C. 103 (a) references. Applicant amended claims 1, 15 and 20 and argued that the 35 U.S.C. 103 (a) references cited in the Office Action dated 10/25/2005 do not support utility for the amended novel features of the independent claims. Examiner stated in the office action that Stamatov in view of Brown disclosed a pressure vessel having a trigger integral with the vessel. The trigger having a stem with a hollow portion and a solid portion that when actuated the hollow portion permitted a gas to flow through a passageway. Applicant amended claims 1, 15 and 20 to provide for a vessel that is able to hold and receive a liquid that has an integral handle where the handle has a trigger coupled to the handle where the trigger includes a stem having a solid portion and a hollow portion so the hollow portion adjoins with the passageway of the handle to allow a pressurized gas to enter into the vessel. As a result, Examiner withdraws the rejection of 35 U.S.C. 103 (a) as the amended claims overcome the rejection.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Campbell on 01/24/2006 at 3:20 pm.

**In the Specification:**

Page 3 line 14 of the specification, replace "387,270" with –D387,270–

**In the Claims:**

Claim 19, line 2 replace "and" with –an–.

**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or reasonably suggest a vessel or container (12) that holds a liquid where the handle (16) has a trigger (22) that is pivotally attached (24) as well as integral with the vessel (Figure 2) and comprises a hollowed passageway (30) in a stem (26) within the trigger (22) that when actuated permits a gas from a pressurized source to enter the vessel (12) via a fitting (20) through the passageways (18 and 30). The prior art of record also fails to disclose a vessel (12) that has a handle (16) integral with a vessel that possesses a pressure relief valve (50) within the handle (16) capable of relieving high-pressure build up from within the vessel (12).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
